Every album and every song ever released by the Beatles - from "Please Please Me" (U.S. 1963) to "The Long and Winding Road" (U.S. 1970) - is dissected, discussed, and analyzed by two music historians in this lively, fully illustrated work. All the Songs delves deep into the history and origins of the Beatles and their music. This first-of-its-kind book draws upon decades of research, as music historians Margotin and Guesdon recount the circumstances that led to the composition of every song, the recording process, and the instruments used. Here, we learn that one of John Lennon's favorite guitars was a 1958 Rickenbacker 325 Capri, which he bought for £100 in 1960 in Hamburg, Germany. We also learn that "Love Me Do," recorded in Abbey Road Studios in September 1962, took 18 takes to get right, even though it was one of the first songs John and Paul ever wrote together. And the authors reveal that when the Beatles performed "I Want to Hold Your Hand" on The Ed Sullivan Show in 1964, John's microphone wasn't turned on, so viewers heard only Paul singing. The hundreds of photographs throughout the book include rare black-and-white publicity stills, images of Beatles instruments, and engaging shots of the musicians in-studio. All the

Songs is the must-have book for the any true Beatles fan.

Mind Over Matter

With their early experiments in psychedelic rock music in the 1960s, and their epic recordings of the 1970s and '80s, Pink Floyd became one of the most influential and recognizable rock bands in history. As "The Pink Floyd Sound," the band created sound and light shows that defined psychedelia in England and inspired similar movements in the Jefferson Airplane's San Francisco and Andy Warhol's New York City. The band's subsequent recordings forged rock music's connections to orchestral music, literature, and philosophy. "Dark Side of the Moon" and "The Wall" ignored pop music's ordinary topics to focus on themes such as madness, existential despair, brutality, alienation, and socially induced psychosis. They also became some of the best-selling recordings of all time. In this collection of essays, sixteen scholars expert in various branches of philosophy set the controls for the heart of the sun to critically examine the themes, concepts, and problems—usually encountered in the pages of Heidegger, Foucault, Sartre, or Orwell—that animate and inspire Pink Floyd's music. These include the meaning of existence, the individual's place in society, the interactions of knowledge and power in education, the contradictions of art and commerce, and the blurry line—the tragic line, in the case of Floyd early member Syd Barrett (died in 2006)—between genius and

madness. Having dominated pop music for nearly four decades, Pink Floyd's dynamic and controversial history additionally opens the way for these authors to explore controversies about intellectual property, the nature of authorship, and whether wholes—especially in the case of rock bands—are more than the sums of their parts.
